

Coming
Soon!

Introducing DHOME.

Modern Home Dialysis Is Coming Soon.

Arkansas will soon have access to home hemodialysis with the Tablo® system and peritoneal dialysis with Simergent's Archimedes system. DHOME combines advanced technology, personalized patient education, and ongoing support to help appropriate patients transition to home dialysis.

WHY CHOOSE TO DHOME?

Care Beyond Dialysis

Through AMR, DHOME can help address non-dialysis needs alongside dialysis care. Patients can access durable medical equipment (DME) and support for other healthcare needs through one connected team.

Next-Generation Technology

DHOME brings together Tablo for home hemodialysis and innovative new cyclers for peritoneal dialysis, expanding home treatment options for patients in Arkansas.

WHY HOME DIALYSIS?

Benefits for Dialysis Patients

- ✓ Treatment on the patient's schedule
- ✓ Less visits to the hospital
- ✓ Greater independence and flexibility
- ✓ Fewer routine trips to a dialysis center
- ✓ More time at home with family
- ✓ Personalized education and support
- ✓ Modern technology designed for home use

SIMPLE REFERRAL PROCESS

Four Easy Steps

- 1 Identify** | Refer a patient interested in home dialysis
- 2 Connect** | Discharge planner schedules your first dialysis training appointment with DHome.
- 3 Train** | Patients receive comprehensive education for their prescribed home dialysis system.
- 4 Support** | Ongoing DME and dialysis support continues after treatment begins.
